

REGION 11 CHICAGO EMS SYSTEM PROTOCOL	Title: Cyanide Exposure - ALS
	Section: Toxins and Environmental
	Approved: EMS Medical Directors Consortium
	Effective: June 1, 2015

CYANIDE EXPOSURE - ALS

Known/Suspected Cyanide Poisoning
(Patient exposure to fire/smoke in enclosed area OR suspected intentional release)

- NOTES:**
- The Cyanokit will be stored on Mass Casualty Vehicles and will be utilized, as available, for mass casualty events when Cyanide poisoning is suspected
 - If prolonged scene time, contact Base Station for possible administration of a 2nd Cyanokit – 5 grams
 - In the event of an allergic/adverse reaction (anaphylaxis, chest tightness, dyspnea, edema, rash) contact Base Station

* All efforts should be made to decontaminate the patient prior to transport, as appropriate per HazMat team.
