JOHN H. STROGER JR. HOSPITAL OF COOK COUNTY
NORTHWESTERN MEMORIAL HOSPITAL
UNIVERSITY OF CHICAGO MEDICAL CENTER

February 2018

Region XI EMS Monthly Pearls

- For **pediatric patients** whose destinations are Lurie or Comer, the patients must be younger than 16 years old and online medical control for these patients preferentially should be through those respective hospitals.
- ➤ All **EMS Plans** must be coordinated though a Resource hospital whereas any multivictim incident can be coordinated thorough your assigned base station.
- When treating patients in cardiac arrest, a rhythm check must be performed every 2 minutes.
- > **Bypass hours** have been high this past month. EMS crews may override bypass via T+5 for any ALS patient.
- The new model **King LTS-D** is now an approved airway device in Region XI. It requires removal of a plastic cap from balloon port prior to inflation.
