

September 2018

## Region XI EMS Monthly Pearls

- **Termination of Resuscitation** should be considered after five rounds of epinephrine as per EMS system policy, previous epinephrine shortages have resolved.
- For **Online Medical Control (OLMC)** calls, the report should begin with the unit **I**dentification, then the **S**ituation or reason for the call, **B**ackground, **A**ssessment, **R**x (treatment)/**R**esponse/**R**equest (I-SBAR).
- For **Pre-Notification** calls, this should be presented as a brief, clear report that provides pertinent information to the receiving hospital staff.
- **Trauma** patients should have a **neurological exam** assessed and documented, this includes mental status, motor and sensory evaluation.
- The mandatory **Adult Assessment** assignment must be completed on Target Solutions by September 17th and users may verify successful completion of the education under the 'My History' section.
