

# Community Paramedic PROGRAM

Using the North Central Curriculum, and in partnership with Waukesha County Technical College (WCTC), this program will serve as the foundational piece of initial education for the Community Paramedic including:

- Core content specific to the Role of the Community Paramedic
- Content-specific to Community and Public Health
- Cultural Competency Community Assessment
- Chronic Disease Assessment, Teaching and Management

The program will begin with one **required** online meeting via Microsoft Teams on **Friday, April 2, from 9:00am - 10:30am** for orientation and introduction to the online learning format. Between April 2 and June 21, participants will work through online modules at their own speed, submitting learning assessments at the completion of each module. All online modules must be completed prior to June 21, when we start the second part of the course.

The second part of the course, scheduled June 21 through June 25, will include **online asynchronous and online synchronous (live) sessions**. The schedule will be confirmed with you no later than our day of orientation (sooner if possible). This was the time where in the past we brought you to campus for a week. Due to COVID, this is not possible at this time. During this week, there will be online sessions that you will complete independently and sessions that will be interactive (live) using Teams, Zoom and Collaborate Ultra.

The final part of the course, **Clinical experiences** may then be completed in Milwaukee or in your home community using established criteria (must be arranged by paramedic/paramedic's home department). It is expected that clinicals will be completed by **August 31, although this date may be extended if needed**. Participants will receive a certificate of completion after all three units have been completed.

**It is recommended that the paramedic considering this program have a minimum of two years of experience, be comfortable with computers and be available to attend the online orientation on April 2 and have some schedule flexibility the week of June 21-25 for "live, interactive sessions."**

**Course fee: \$2,500/paramedic**
